

ADTA 5750.501: Final Project

Final Presentation: Important Information

1. Overview

In the **final project**, each group develops a **conversational AI system**. On the last class meeting, the group presents the system to the class.

Each group has about **15 minutes** for the presentation:

- **10 minutes** for presentation
- **5 minutes** for questions, answers, and comments

2. Final Project: Final Presentation: What – When – How

WHEN:

Final Project Presentation: **Monday, 12/02/2024 (WEEK 16)**.

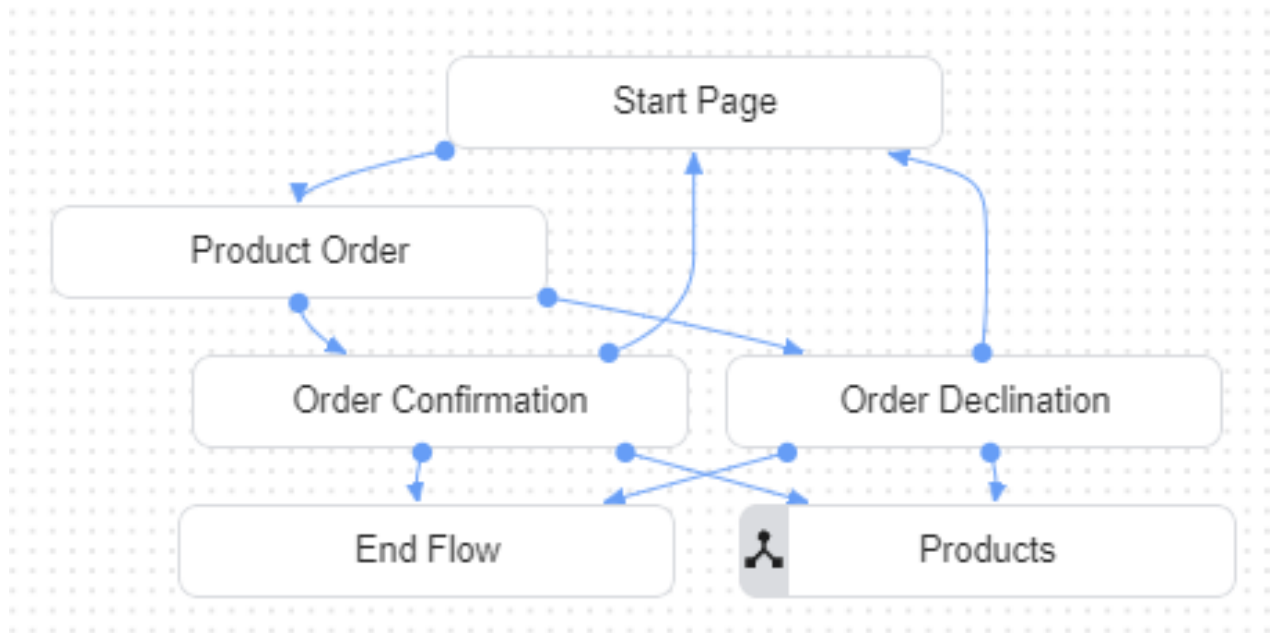

WHAT:

The presentation focuses on two areas: Intents and State Machine

1. **Selects** **one** of the **intents** of the AI Dialogue System.
2. **Present** the **complete state machine of the flow** related to the selected intent.
3. **Present** all the **pages** included in the flow.
4. **Present** the **form parameters** of each page included in the state machine.
5. **Run** the **tests** of the system using the **presented intent**.

For example: An AI Dialogue system for a retailer

1. Select one intent: Order.product
 - a. A training phrase: I want to buy two orange shirts, medium, for men.
2. Present the complete state machine of the flow related to the selected intent.

3. Present all the pages included in the flow

- a. Start page
- b. Product Order
- c. Order Confirmation
- d. Order Declination

NOTES:

- *Don't need to show the "End Flow" page*
- *Products: Another flow of the system – Don't need to present*

4. Present form parameters of each page, i.e., each intent

- a. Start page
- b. Product Order: ...
- c. Order Confirmation: ...
- d. Order Declination: ...

5. Test the system with the presented intent

(..... Continue on the next page)

HOW:

- For each team, **every member** must **participate** in the presentation, i.e., actively deliver part of the presentation, to **get grades**.

NOTES: *Any team member who did not present any content in the team presentation would not get any points for the presentation.*

- **All teams must be present in class by 5:30 PM.**
- To be fair, the order of presenting, i.e., which team makes the presentation first, second, and so on, is determined by drawing a team number randomly.
